Dear Dewi,

Key Stage 4 outcomes for 2010

I am delighted that the improvements made by schools over recent years have accelerated in 2010. This summer has seen the achievement of students in Liverpool by the 5A*-C including GCSE English and mathematics measure increase to within touching distance of the national average. The background achievement of 5A*-C within Liverpool is now far beyond national.

These are impressive achievements and testimony to the hard work, creativity and professionalism of school leaders and teachers within the city.

I should like to thank and congratulate your school on the contribution you have made to the success of Liverpool's students this year. In particular I note that at 5A*-C including GCSE English and mathematics you have:

- met the statutory target set by your school's Governing Body
- exceeded your top quartile (FFT-D) forecast

Within the aims of Liverpool City Council, raising educational standards even further is an imperative for the city. I know that you are continuing to work hard to innovate and to engender professional standards amongst your teaching and support staff to secure students' progress.

Please be sure to pass my thanks on to your staff for their hard work, perseverance and professionalism.

Yours sincerely,

Stuart Smith
Director for Children, Families and Adults

Outstanding!
